

How is Montessori designed to prepare children for the "real world?"

Posted on Dec 04, Posted by [Britney Peterson](#) Category [Parent Education](#)

Thank you to those parents who recently attended our Elementary Admissions Information Meeting. Remember, if you have a child who is moving into 1st or 4th grade next year, this meeting is MANDATORY for both parents. Also, if you are currently still in process of deciding whether your Kindergartner or 3rd grader will continue with us next year, we recommend you come to the next meeting where Margaret, our Elementary and Middle School Program Head, will answer your questions regarding curriculum as well as social development of Elementary age students. Many of the attendees of our meeting last Friday were especially excited by the brief overview of the Montessori Math materials.

During the meeting some questions were raised about Montessori students transitioning to schools with a more traditional approach to education. Tim Seldin wrote an article entitled "What are the real benefits of sending a child to Montessori?" which sufficiently explains the ways in which Montessori children are prepared to transition to other environments. I recommend this article for any parent who has a child enrolled in a Montessori program or who is considering a Montessori education for their child. [Read Tim Seldins article here...](#)

We invite any parents with questions regarding enrollment for your child next year to make an appointment with either your students teachers or a member of our Administration where we will be happy to address any questions or concerns you might have. Also, dont forget that our next Elementary Admissions Information meeting is coming up this Friday, December 7th @ 8:30am.

This Upper Elementary student works on the Peg Board during work time.
